## How do I prevent my lasagne from becoming watery?

A watery lasagne is often due to too wet sauce or undrained ingredients (such as spinach or ricotta). Make sure your sauce is well-cooked and not too thin. Drain ingredients with a lot of moisture, such as vegetables or ricotta, well first or fry them briefly. It also helps to let the lasagne rest for 10-15 minutes after baking before you cut it-so the layers can set properly and the dish stays firm.
