

# WHO IS HENRI WILLIG?

Henri was born and raised on a dairy farm in Katwoude. As the only son among four sisters, he was destined to become a farmer. After studying at agricultural college, he started full-time work at his parents' family farming business at 16 years of age. What started out as a new challenge for his dairy farm, soon became a touristic top attraction boasting over a million visitors a year.

He took a course in 'cheese making', which proved to be a great success. The panoramic 'Polderview' and the traditional method of making cheese attracted many people, especially foreign tourists: "I remember March 3rd, 1975, when unexpectedly, a busload of tourists came driving into our yard. We were totally unprepared!!" This was the beginning of daily arrivals of tourist buses that came to see the old craft of cheese-making explained in their own language. It has become a well-known attraction in Holland and abroad.

In 1974, Henri Willig and his wife, Riet, took over his parents' company. Henri soon realized that his ambitions were greater.
